Best Practice- 1

1. **Title of the Practice: Bridge Course 'Basic Electronics'**

A bridge course is a type of educational program that helps students transition from one educational level to another. The purpose of a Bridge Course is to help students by developing their academic skills and knowledge for moving to higher level of study. Bridge courses typically provide students with the skills and knowledge they need to be successful in their new educational setting. A bridge course is designed to provide students with a solid foundation in the basic academic skills and knowledge they need to succeed in their college studies. A bridge course for newly admitted students is conducted every year before the commencement of the first semester classes. The main objective of the course is to bridge the gap between subjects studied at Pre-university level and subjects they would be studying in Graduation. The syllabus for the course is framed in such a way that they get basic knowledge on the subjects which they would be learning through graduation.

Objectives of the Practice:

- Introduce necessary basics of the subject.
- Strengthening the foundation of the subject.
- Generating and enhancing interest in the subject
- Generate confidence and skills to successfully transit to new curriculum

The Context:

Students coming from 12th Science to First year B. Sc. have many options of subjects to choose from. Students have liking for Electronics as a subject which is having more career opportunity as well as is necessary for Computer Science also. During introduction lectures for First year Teachers observed that student select Electronics as one of the subjects but they lack basic knowledge of the subject. Teachers felt need to design a Bridge course in 'Basic Electronics'.

The Practice:

A Curriculum is framed separately for Bridge Course. During the first week after the commencement of the classes, teachers appeal the students to join the 'Bridge Course', as it is conducted in the initial days of the semester. use college-level materials and provide instruction and ample practice in basic academic skills. The course is offered over the minimum duration. Syllabus and Time Table of the course is provided to the students. Teachers use college-level materials and provide instruction and ample practice in basic academic skills. Previously it used to be conducted offline mode but now it is online mode of teaching. A post bridge course test is conducted after the completion of bridge course syllabus to assess the ability of student's suggestions are given to students for improvisation.

Evidence of Success:

Performance of regular Bridge course students is far better than those not attending the course. Most of the students score well in the final examination. They find it helpful to opt for special subjects like Electronics or Computer Science.

Problems Encountered and Resources Required

Sometimes there is time constrained for teachers and students as time table of First year is very packed. After shifting to online mode of teaching the problem is quite resolved. But, the students face connectivity problem.
